

Research Institute for Biotechnology and Environment (RIBE), Nong Lam University (NLU)

Founded in Thu Duc District, HCMC in 1955, NLU is one of the first academic institutions providing training in forestry and agricultural sciences, supplying high-skilled human resources in different fields for Central Highland, Central Coast and Mekong Delta provinces. Its 118-ha main campus is 16 kms to North of the city's central business district. The university's 12 faculties and 2 departments provide undergraduate and postgraduate courses in 3 semesters in a year. Its vision is to become an Asian leading multi-disciplinary research university of international standard.

Research Institute for Biotechnology and Environment (RIBE) was established in 2002. The goal of the Institute is promote research activities and scientific product development, RIBE constructed 4-ha practical station dividing into many functional sub-areas for environmental research, bio-control agents, edible and medical mushrooms, and insect rearing.

Okayama University

In Chuo-ku Region, Okayama Prefecture, Okayama University is one of Japan leading Universities with over 140 years of history. It is situated on an extensive campus and has 11 faculties, 7 graduate schools providing undergraduate and post-graduate training for currently 20,000 students in humanities, social, natural, environmental and life science, and pedagogics. The University has achieved Japanese Education Rewards such as Excellence in Research, Excellence in Education, Affordable Capus Life, Safe and Convenience, Friendly and Welcoming.

**Summer Course on
“Biotechnology Application
in Plant Science and
Sustainable Cultivation”**

The Summer Course on "Biotechnology Application in Plant Science and Sustainable Cultivation" will be jointly organized by Okayama University and Research Institute for Biotechnology and Environment - Nong Lam University during 23 -31 August 2019 at Research Institute for Biotechnology and Environment - Nong Lam University, Ho Chi Minh city, Vietnam. Participants would benefit from not only provided knowledge on environment and sustainable agriculture, laboratory exercise and fieldtrip to Dalat city, but also networking with other people with similar academic interest.

It would be an outstanding opportunity for the participants to experience Japanese knowledge and skills. The subjects will be given by lecturers and professors from both Okayama University and Research Institute for Biotechnology and Environment - Nong Lam University in English language.
